Customer Reviews

Great series of books teaching how to play the piano. Our piano teacher uses this series, and I have spoken to at least four more instructors in the area that all use these series to teach piano. Our daughter started with the first book in the series at age 5 and has been going through the books for the last two years. They teach the concepts progressively, with focus on good technique, enough variation, and a good selection of songs. She is never bored, and learns at a consistent pace. The main books for each level are called "Lesson Book". The "Technique and Artistry Book" for the same level is a companion to help students improve their knowledge and technique about music and piano artistry. So they complement each other well, and we tend to move in parallel in both of those books. We primarily use those two in our classes. For each level there are also "popular repertoire" and "christmas books" that take well known and liked songs and arrange them for that specific level of learning. We've sprinkled these here and there to keep things interesting for our daughter. There are also CDs that accompany the books, but I have no experience in those.

I love the Faber series, but prefer the other Level 3B Christmas book because it has a larger

selection. It is well done with nice arrangements as the Faber books always are, but I'd go for the other 3B Christmas book.

As always, we are grateful to Faber for making music learning fun and accessible to our four piano players at home! Our teachers overseas enjoy assigning age- and level-appropriate material for each season, and this Christmas album is already well-played.

Great piano series. We homeschool our three children and have used this series for four years. It is easy to follow and fun. What more could a parent and teacher ask for?

The pieces in this book are not the 'favorites' for most young students playing on this level. They are too short and the Stocking Stuffer page is a waste. I've had my students play in several levels of this Christmas series and I think the Primer is the only good level.
