& Money

Customer Reviews

Being an Handmade seller and curious about the SEO information, I was excited to read this short book. My problem with this content is that there are numerous grammatical errors, punctuation mistakes and misspelled words throughout. These oversights became distracting to the point of frustration and almost caused me to abandon the material. I think there are some interesting ideas concerning the SEO information as it relates to the comparison between Google's and 's processes and analytics. I disagree with a few ideas, however, such as keyword stuffing a title in . I don't want to take a chance on my listings being suppressed due to potentially going over the character restrictions per the instructions that I've received as an Handmade seller. I particularly liked the information regarding using bullet points in a listing, which is something I did not know. After reading this text and doing a quick search in regarding listing specifications, the bulleted suggested was mentioned there as well. I will now update my handmade listings with bulleted product points to test for improvement in stats and sales, thanks to what I learned here. SEO is an important topic everywhere, but especially for me as it directly relates to my experience as an Handmade seller. This book also educates me on the comparisons to Google Shopping which will be something else I need to brush up on. This is a quick read, which is convenient. I did learn something. I warn the author, however, to revise this edition promptly to get rid of all editing errors mentioned previously.

I found this book to be wonderfully short, sweet and directly to the point with exactly the sort of information that its product description promises. Being an seller myself, I found this material to be quite helpful, especially the URL shortening trick. I removed a star from the rating because of spelling and grammar errors. I had this book read to me from the Kindle Fire's text-to-speech function so it was pretty obvious when the voice was trying to read a misspelled word.

For me, like for new one on this book opened eyes and door for ranking my page. Last 2 days I tried find correct information, but without success. And BANG! I found this guide! This author opened my eyes and door for start right sales! Thank you!!!

Excellent and direct with no hidden agendas thank you & I look forward to more
