Customer Reviews

This is not really a book about "crushing" low stakes poker, a more accurate title would be "harvesting the low-hanging fruit" in low stakes poker. This is not a criticism, the author needs a more dramatic title to sell books. But he makes his attitude clear. Early on, he advises readers to only select games with fish, and to unparticipate if good players join later. A player who can crush the game should at least hold his own versus good players, and would want to defend his hunting grounds when he finds a good game. But it's safer to go away and look for easier pickings. The book repeatedly advises folding hands with positive expectations, or checking when you are ahead, because you'll have better opportunities to make money later. He tells you how to exploit what the other players are doing, not how to bend them to your will. If you want to make consistent money at low stakes Sit 'n Gos (buy ins around \$10), this book tells you how to do it. It's clear and authoritative, and the author is experienced. It goes into detail about software to use, bankroll management and other essential elements. It really is all you need (some of the elementary information is in appendices). It's short and easy to understand, even for a beginner. Nevertheless, I don't recommend this book if your goal is to make a few dollars per hour in on-line poker. A minor reason is game availability and edge potential in low stakes Sit 'n Gos has declined quite a bit since this book was written. The major reason is the book is too good for such an easy goal. It doesn't just tell you how to beat low stakes games, it teaches you why things work. This is extra work you don't need if you're never venturing out of low stakes.
