Seeing The Whole: Mapping The Extended Value Stream (Lean Enterprise Institute)

Synopsis

Winner of the 2003 Shingo Prize! By identifying all the steps and time required to move a typical product from raw materials to finished goods, the authors show that nearly 90 percent of the actions and 99.99 percent of the time required for the value chain's Current State create no value. In addition, the mapping method clearly shows demand amplification of orders as they travel up the value stream, steadily growing quality problems, and steadily deteriorating shipping performance at every point up stream from the customer. The mapping methodology takes managers step-by-step through an improvement process that converts the traditional value stream of isolated operations into an ideal future-state value stream in which value flows from raw materials to customer in just 6 percent of the time previously needed. The dramatically improved value stream also eliminates unnecessary transport links, inventories, and handoffs, the key drivers of hidden connectivity costs. Applying the method to a realistic example, the authors show how four firms sharing a value stream can create a win-win-win-win-win future in which everyone, including the end consumer, can be better off.

Book Information

Series: Lean Enterprise Institute

Spiral-bound: 97 pages

Publisher: Lean Enterprise Institute; 58705th edition (November 1, 2002)

Language: English

ISBN-10: 0966784359

ISBN-13: 978-0966784350

Product Dimensions: 0.8 x 9.8 x 11 inches

Shipping Weight: 1.3 pounds

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #928,259 in Books (See Top 100 in Books) #106 in [Books > Business & Money > Management & Leadership > Quality Control & Management > Lean](#) #708 in [Books > Business & Money > Management & Leadership > Quality Control & Management > Quality Control](#) #2729 in [Books > Textbooks > Business & Finance > Management](#)

Customer Reviews

This book is in the same format as its predecessor "Learning to See". This series of books is outstanding. The format, information are excellent. If I had to suggest improvement, it would be to include more exercises.

Seeing the Whole is essential to understanding how to move a value stream from its current, wasteful state to a future state, not just within your four walls but outside those walls to include the upstream and downstream.

Yes

This is a great example of how to set up the flow of production operation.
