Customer Reviews

This book is exceptional. It starts with providing the reader with the basics of distressed situations: the parties involved in restructuring, academic research regarding investment returns, the bankruptcy process, etc. The remainder of the book is primarily composed of case studies grouped

into three categories (1) liability restructuring, (2) asset/equity restructuring, and (3) restructuring employee's claims. The cases are exceptionally well written. Many reviewers complain that the book would be better with a supplement that discusses "solutions" to the cases. I agree, those would be nice to have. However, the author uses his book to conduct his Harvard MBA course on restructuring. The value of the cases would obviously be compromised if answers were released. Maybe he will do so when he retires. For those interested in restructuring, the following is a list of my favorite books organized by subject area.

Bankruptcy process:

1. The Executive Guide to Corporate Bankruptcy - Legal text with comprehensive coverage on the bankruptcy process
- Strategies of distressed investors:

 1. The Art of Distressed M&A - Good book for strategic buyers who want to purchase the company or a business unit prior to bankruptcy or through a section 363 transaction during bankruptcy
 2. Distressed Debt Analysis - Good book for hedge fund managers who are looking to purchase distressed debt usually to extract short-term profits. Structural arbitrage is only briefly discussed.

- Turnaround Management:

 1. Corporate Recovery - Discusses how to turnaround companies nearing, but not in, bankruptcy
 - 2.
