Customer Reviews

If the goal is to improve your skills while you're on the road, this product fails. There's just TOO much great content to absorb without a notebook nearby. There's sections on how to start the conversation, how to get value out of it, and how to follow up. I really enjoyed the section on finding a mentor. As for the audiobook, the production values are really high! There are different voice actors, there's music transitions, and there's audio cues.

Completely useful and full of great advice. I would recommend this product to anyone in the business world or any career for that matter. Networking is completely useful and this helps in understanding how to network. After all, "it's who you know."
